WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US04/26744

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/26744

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims 3, 6, 9, 25, 26, and 31-33 YES

Claims 1, 2, 4, 5, 7, 8, 10-24, 27-30, 34-46 NO

Inventive step (IS)

Claims NONE YES

Claims 1-46 NO

Industrial applicability (IA)

Claims 1-46 YES

Claims NONE NO

2. Citations and explanations:

Claims 1, 2, 4, 5, 7, 8, 10-24, 27-30 and 34-46 lack novelty under PCT Article 33(2) as being anticipated by Seutter et al (US 2003/0215570 A1). Seutter et al discloses all above claimed subject matter (pg.2, paragraph 0020 thru pg.5, paragraph 0037).

Claims 3, 6, 9, 25, 26, 31-33 lack an inventive step under PCT Article 33(3) as being obvious over Seutter et al (US 2003/0215570 A1). Seutter et al discloses the flow rates of HCD, inert gas (claim 3; pg.2, paragraph 0021), hydrogen-containing gas (claim 6; pg.2, paragraph 0022), silicon containing gas (claim 9; pg.2, paragraph 0022) (pg.5, paragraph 0037), germanium film (claims 25 and 26; pg.2, paragraph 0023), and providing the process chamber pressure (claims 31-33; pg.2, paragraph 0020) however, Seutter et al does not disclose the specified flow rates, percentage of germanium film, nor the process chamber pressure.

Claims 1-46 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
